3rd Quarter 2010
Status Report

Summary

During the period between July 1, 2010 through September 30, 2010, groundwater and surface water monitoring at the Coliseum Boulevard Plume (CBP) site continued. Additionally, construction of the Kilby Ditch corrective measures including construction of stream restoration features, grade control structures and the wetland treatment system was completed. Environmental sampling to monitor effectiveness of the wetland treatment system began in July 2010. Samples are collected from the treatment system monthly.

Quarterly monitoring of groundwater monitoring wells and continuous multi-channel tubing (CMT) wells was conducted in July 2010 in accordance with the approved plans and is summarized in Section I. This report contains results of samples collected for the July 2010 Sampling Event. Additionally, surface water samples were collected near the Montgomery Zoo and in the southwest area of the CBP. Sediment and surface water samples were also collected in the Low-Lying Area. Beginning in the 4th Quarter 2010, samples will be collected from the wetland treatment system and samples historically collected from the Low-Lying Areas will no longer be collected.

Surface water samples are also collected from the Southwest Area treatment system monthly and are included in this report.

Section II contains information about treatment of purge water generated during this period.

Section III contains a summary of quality assurance/quality control (QA/QC) samples collected during this period.

Section IV contains a summary of the Kilby Ditch Construction Activities through September 2010.

I. Routine Monitoring

Water Level Measurements

July 28 through July 30, 2010: Depths to ground water were measured in piezometers, monitoring wells, and pump test wells associated with the Coliseum Boulevard Plume Investigation. Groundwater elevations are provided in Tables 1a through 1f. Groundwater elevation contours for the 100 and 200 series "shallow zone" monitoring wells and piezometers are shown on Figures 1 and 2, respectively.

Depths to ground water were measured on July 28-30, 2010 in continuous multi-channel tubing (CMT) wells 1 through 4 and are reported in Table 2. CMTs 3-1 and 4-1 were dry for this event. CMT wells 5 and 6 were not monitored in this event.

Semi-annual Sampling Event (Modification to Addendum 13 Work Plan)

A semi-annual sampling event was conducted in accordance with the Modification to Addendum 13 – Ground Water Monitoring Plan (dated March 17, 2005). This event was conducted in July 2010.

The following 110 wells were included in this semi-annual monitoring event.

MW-101	MW-210	MW-124	MW-134	MW-341	MW-250B	MW-261
MW-201	MW-111	MW-224	MW-234	MW-342	MW-250C	MW-262
MW-102	MW-211	MW-125	MW-135A	MW-143A	MW-151A	MW-263
MW-202	MW-311	MW-225	MW-235B	MW-243B	MW-251B	MW-264
MW-103	MW-112	MW-128	MW-235C	MW-144A	MW-152A	MW-265
MW-203	MW-212	MW-228	MW-136A	MW-244B	MW-252B	PZ-18
MW-105	MW-113	MW-129	MW-236B	MW-244C	MW-153	PZ-19
MW-205	MW-213	MW-229	MW-236C	MW-145A	MW-154	PZ-20
MW-106	MW-115	MW-130	MW-237A	MW-146A	MW-155	PZ-21R
MW-206	MW-215	MW-230	MW-237B	MW-246B	MW-156	PW-5
MW-107	MW-116	MW-131	MW-237C	MW-147A	MW-357	MW-1A
MW-207	MW-216	MW-231	MW-138A	MW-247B	MW-457	MW-2A
MW-108	MW-117	MW-132	MW-238B	MW-149A	MW-158	MW-3A
MW-208	MW-217	MW-232	MW-238C	MW-249B	MW-358	MW-5A
MW-109	MW-123	MW-133	MW-339	MW-249C	MW-259	
MW-209	MW-223	MW-233	MW-340	MW-150A	MW-260	

CMT wells 1 – 4 were also sampled this event.

Prior to sample collection, the monitoring wells were purged using a bladder or peristaltic pump until field parameters (pH, conductivity, and turbidity) stabilized. Temperature and redox (ORP) were also measured in the field. The field data sheets are attached.

The samples collected from the monitoring wells were analyzed for VOCs by EPA Method 8260. The concentrations of selected VOCs in groundwater samples collected from the monitoring wells are shown on Plate 1. Current and historical results are shown in Table 3.

Quarterly Sampling of the Continuous Multi-Channel Tubing (CMT) Wells

July 19-23, 2010: Groundwater samples were collected from CMT wells 1, 2, 3 and 4. Samples were not collected from CMTs 3-1 and 4-1 due to insufficient water / recharge in the CMT ports. CMT wells 5 and 6 were not monitored in this event.

After measuring the depth to water, each CMT port was purged using a peristaltic pump until field parameters (pH, conductivity, and turbidity) stabilized or three (3) well volumes were removed. Temperature and ORP were also measured in the field.

During sample collection, the tubing from the pump was disconnected and withdrawn from the port. The water samples were collected by draining the water from the bottom end of the tubing (end previously inside the port) into the sample containers. The groundwater samples were analyzed for VOCs.

Results of VOCs collected from the CMT wells are provided in Table 6. Laboratory reports for these analyses and copies of the Monitoring Well Sample Forms are attached.

The locations of the CMT wells and the results are shown on Figure 3.

Surface Water Sampling

Montgomery Zoo Area
Surface water samples were collected on July 30, 2010 from the Zoo Ditch at one location (ZD-1) and the Zoo Pond at one location (ZP-1). The surface water samples were collected from the central part of the zoo ditch and from the pump intake location at the Zoo Pond.

Figure 4 shows the locations of both sampling points.

The water samples were placed on ice and transported to the laboratory for analyses of VOCs. Results of VOCs are provided in Table 7a. The laboratory reports for the VOC analyses of the surface water samples are attached.

The sample collected at the Zoo Ditch (ZD-1) contained chloroform at a concentration of 2.9 ug/l. No TCE or other VOCs were detected in the sample collected from the Zoo Pond sampling location (ZP-1).

At each sample location, the water samples were also measured for temperature, pH, dissolved oxygen (DO), specific conductance, and turbidity. Results of these measurements are provided in Table 8.

Note that Tables 7 and 8 have been modified to remove the prior sampling locations at the Kilby Ditch.

Southwest Area
In July 2009, ALDOT purchased the former North Montgomery Materials mining site in the southwest area of the CBP. The NPDES permit was transferred and ALDOT has continued monitoring and submitting Discharge Monitoring Reports (DMRs). In addition, ALDOT collects samples from within the former mine area monthly for VOC analyses to evaluate effectiveness of treatment system. Results of VOC analyses are summarized in Table 7b. Samples are also collected for Total Suspended Solids (TSS) and pH in accordance with the Southwest Interim Operating Plan. ALDOT also collects samples for Volatile Suspended Solids (VSS). Results are included in Table 7c.

Kilby Ditch Area
Physical Construction of the Kilby Ditch Corrective measures and the wetland treatment system was completed during the Third Quarter 2010. Effectiveness and Compliance monitoring samples were collected in July, August, and September 2010.

Table 10 has been modified to include the New Sampling locations.

Low – Lying Areas (Addendum 04 Work Plan)

Soil/sediment samples were collected July 12-13, 2010 from locations A-H and N, O, and P in the “Low-Lying Areas.” Surface water samples were collected July 12-13, 2010 from locations G, H, N, O, and P. Surface water sample locations A-F were not sampled because they were dry. Results of the analyses for VOCs in soil / sediment samples and surface water samples are provided in Tables 9 and 10, respectively. Sample locations N, O, & P will hereafter be referred to as LLA-9, LLA-10, and LLA-11; respectively. Samples were not

collected from locations I-M due to the construction in the Lower Kilby Ditch Area. Due to the completion of the Kilby Ditch Corrective Measure, sample locations A – F will no longer be sampled. Sample locations I – M have been replaced with new effectiveness monitoring locations identified in the draft Long Term Monitoring Plan and Kilby Ditch Corrective Measures Implementation Plan (CMIP). Sampling at the new locations has commenced this 3rd Quarter 2010.

Trichloroethylene was detected in five of the surface water sample locations in the low-lying areas including four of the eight new sampling locations. The TCE concentrations detected were: LLA-1 (3.4 ug/L), LLA-3 (1.6 ug/L), LLA-4 (10.1 ug/L), LLA-8 (5.7 ug/L) and LLA-11, former location "P" (24.5 ug/L). There was no detectable VOCs at the compliance sample location prior to discharge to Three Mile Branch or in any of the three samples collected within Three Mile Branch.

Only sample location D contained a detectable VOC in a sediment sample. The o-Xylene concentration detected was 5 ug/kg. The source of o-Xylene is unknown at this time, but o-Xylene is not a constituent of concern in the CBP.

Laboratory reports of the analyses are attached.

Three Mile Branch / Newell Property
Surface water samples are also collected from three locations in Three Mile Branch and from seeps on Newell Property east of Three Mile Branch. The surface water sample locations are shown on Figure 9 and results reported on Table 7d.

II. Investigation Derived Waste

Water Treatment

July 2010: Water accumulated during decontamination of sampling equipment, and purging and sampling of groundwater monitoring wells during the July monitoring event was stored in a plastic 1,200 gallon above-ground tank at the wastewater treatment system on Coliseum Boulevard near the West Kilby Ditch.

The date(s) and volume(s) for discharge of treated purge water are shown below.

Discharge Date	Volume of Discharge	Purge Water (Influent)				Treated Effluent
		TCE*	Cis-1,2-Dichloro-ethene	1,1-Dichloroethene	Vinyl Chloride	TCE
	(Gallons)	(ug / l)	(ug / l)	(ug/l)	(ug/l)	(ug / l)
8/9/2010	800	87	3.3	2.1	<1.0	<1.0

The Montgomery WWSSB was provided the discharge date(s), volume(s) and monitoring data.

III. Quality Assurance/Quality Control

During the July 2010 quarterly groundwater sampling event, duplicate groundwater samples were collected from monitoring wells MW-113, MW-135A, MW-144A, MW-156, MW-158, MW-1A, MW-216, MW-223, MW-225, and MW-233 and were analyzed for VOCs. No duplicate samples were taken from CMT wells during this sampling event. The duplicate sample results are shown with the parent sample results in Table 3.

There were no detected VOCs in trip blanks for this sampling event.

IV. Kilby Ditch Construction Project

McDonald Construction began construction in the Kilby Ditch Area in August 2009 and completed physical construction in July 2010. The work was conducted in accordance with the Corrective Measures Implementation Plan. Work in the Upper Kilby Area included installation of box culverts in the West Kilby Ditch, slope stabilization and the addition of rip-rap to the northern section of Main Kilby Ditch. Work in the Lower Kilby Area consisted of construction of a Wetland Treatment System, a hydraulic barrier and restoration of Kilby Ditch.

Environmental sampling to monitor effectiveness of the treatment system began in July 2010. The sample results are shown in Table 10.

During the Kilby Ditch Construction project, there was 65.86 total inches of rainfall. See table 12. The storm water permit for the Construction Project was reauthorized on April 19, 2010.

Notes:

[1] Feet above mean sea level
[2] Feet below land surface
[3*] Water elevations are only measured in CMTs when samples are
[4] Water covering well apparently resulted in identical readings for all channels.

Table 3. Results of analyses of detected volatile organic compounds (VOCs) [1] in ground-water samples from monitoring wells; July 2010 Status Report; Coliseum Boulevard Plume Investigation; Montgomery, Alabama.

Notes:

1 Samples were analyzed in accordance with Method 8260 outlined in Test Methods for Evaluating Solid Waste Physical/Chemical Methods , EPA, SW-846.

2 MDL - Method Detection Limit of 1.0 microgram per liter (µg/L) for the laboratory analyses. Detection limits varied for some samples and are indicated in parentheses ( ).

3 ND - Not Detected; Detection limits varied for some samples and are indicated in parentheses ( ). Compounds were not detected at an elevated detection level for the sample.

4 J - Concentration below calibration curve but above detection limit. In July 2005, the definition of a "J" flag was modified to flag samples with concentrations below the practical quantitation level, rather than the calibration curve values.

5 dup - Duplicate samples were collected for quality assurance/quality control purposes.

6 Samples

7 Ground-water samples collected from monitoring wells MW-103 and MW-203 may have been inadvertently switched in the field during the October 2004 sampling event.

8 B - Compound of interest was found above the detection limit concentration in a laboratory blank sample

9 Samples collected from monitoring wells MW-104 and MW-109 on October 6, 2003, were reanalyzed out of holding time.

10 Corrected results - Constituent results for monitoring well MW-108 were inadvertently transposed in October 2002.

11 NS - Not Sampled; Monitoring wells MW-122, MW-220 and MW-222 were abandoned on May 20, 2005 at the request of the Alabama Department of Environmental Management.

12 Monitoring wells MW-131, MW-231 and MW-237C were initially sampled on April 7, 10, and 12, 2006, respectively. The wells were resampled for VOCs during the collection of samples for methane, ethane and ethene analyses on April 14 and 20, 2006.

13 Ground-water samples collected from monitoring wells MW-138A and MW-238B may have been inadvertently switched in the field during the April 2006 sampling event.

14 MW-143A, MW-144A, MW-244B, MW-244C, MW-145A, MW-146A, and MW-246B were initially sampled April 3-7. Samples were inadvertently not collected for inorganic (alkalinity, chloride, nitrate, nitrite, and sulfate) analyses. Wells resampled 04/9 and 04/11 2005.

15 Monitoring well MW-145A was initially sampled on July 9, 2005, but a duplicate sample and a sample for total iron were not collected for analyses due to insufficent groundwater, therefore, the well was resampled on July 28, 2005.

16 This monitoring well was not sampled because the well was dry or did not yield sufficient purge volume for sampling.

17 LT - Sample lost in transit.

18 I = Initial measurement - low flow purge technique.

19 F = Final measurement- low flow purge technique.

20 NS - Based on a request from a property owner in the southwest area of the CBP, PZ-21 was abandoned and replaced with PZ-21R on ALDOT property on May 24-26, 2010.

Notes:

[1] Samples were analyzed in accordance with Method 8260 outlined in Test Methods for Evaluating Solid Waste Physical/Chemical Methods, EPA, SW-846
[2] MDL - Method Detection Limit of 1.0 microgram per liter (µg/l) for the laboratory analyses. Detection limits varied for some samples and are indicated in parentheses ( )
[3] ND - Not detected; Detection limits varied for some samples and are indicated in parentheses (). Compounds were not detected at an elevated detection level for the sample.
[4] J - Concentration below calibration curve but above detection limit. In July 2005, the definition of a "J" flag was modified to flag samples with concentrations below the practical quantitation level, rather than the calibration curve values.
[5] B - Compound of interest was found above the detection limit concentration in a laboratory sample
[6] NA - Not analyzed
[7] NS - Not Sampled. Port did not contain sufficient water for sample collection.

Notes:

[1] Samples are proposed routine effectiveness samples that are collected monthly. The frequency may be adjusted after additional results are evaluated.

[2] Samples were collected for evaluation of the system and may no longer be collected. These samples are not routine proposed effectiveness samples.

[3] Seep samples were collected along the east side of the excavation face from inactive mining area.These samples are not routine effectiveness samples.

ND - Not Detected.
NS - Not Sampled.

Note:

NS - Not Sampled.
TMB - 1 is formally known as SW - 1.
TMB - 2 is formally known as SW - 2.
TMB - 3 is formally known as H in "Low-Lying" Report.

Notes:

[1] All field parameters were measured with a YSI multi-parameter (556 MPS) meter.
[2] °C - Degrees Celsius
[3] µmhos - Micromhos
[4] s.u. - standard units
[5] mg/l - milligrams per liter
[6] ntu - nephelometric turbidity units
[7] NM - Not measured; Technician inadvertently did not measure the parameter.
[*] NS = Not Sampled - equipment malfunction

Table 9. Concentrations of detected volatile organic compounds (VOCs) [1] in samples of sediment from the "Low-Lying Areas"; 3rd Quarter 2010 Status Report; Coliseum Boulevard Plume Investigation; Montgomery, Alabama. [Distributions of VOCs in sediment/soil samples are shown on Figure 5.]

Notes:

[1] Samples were analyzed in accordance with Method 8260 outlined in Test Methods for Evaluating Solid Waste Physical/Chemical Methods, EPA, SW-846.
[2] MDL - Method Detection Limit of 3.0 micrograms per kilogram (µg/kg) for the soil laboratory analyses
[3] ND - Not Detected
[4] NS - Locations I-M were not sampled after July 2009 because of construction in the Lower Kilby Ditch Area.
* From this point on, location N will be referred to as LLA-9, location O will be referred to as LLA-10, and location P will be referred to as LLA-11.

SUMMARY REPORT

This report is a summary of results for the analysis of the samples listed below that were received by the laboratory on 07/09/10 13:40. A final report package will follow by mail, which will contain additional information concerning these analyses. If you have any questions concerning this report, please feel free to call Susan Maynord at (251) 344-9106.

Sample Description	Laboratory ID	Matrix	Sample Type	Date Sampled	Date Received

SUMMARY REPORT

This report is a summary of results for the analysis of the samples listed below that were received by the laboratory on 07/09/10 13:40. A final report package will follow by mail, which will contain additional information concerning these analyses. If you have any questions concerning this report, please feel free to call Susan Maynord at (251) 344-9106.

Sample Description	Laboratory ID	Matrix	Sample Type	Date Sampled	Date Received

SUMMARY REPORT

This report is a summary of results for the analysis of the samples listed below that were received by the laboratory on 07/23/10 15:15. A final report package will follow by mail, which will contain additional information concerning these analyses. If you have any questions concerning this report, please feel free to call Ken Mohr at (251) 344-9106.

Attention: Hal Wood

Project: ALDOT-Coliseum Blvd Plume
Project Number: 06-401

Reported:
09/03/10 15:16

Date Sampled: 07/26/10 07:30
Date Received: 08/03/10 13:00

Trip Blank
10H0033-04 (Aqueous)

Sampled by: Scott Baxter
Sample Type: Grab

Analyte	Batch	Prepared	Analyzed	Analyst	Method	RL	Units	Result	Notes
Volatile Organic Compounds by EPA Method 8260									
Chloromethane	0H10013	08/10/10 10:38	08/10/10 20:00	CRC	EPA 8260	1.0	ug/L	< 1.0

QUARTERLY GROUND WATER MONITORING WELL

ENVIROCHEM Environmental Laboratories

Project: ALDOT/Coliseum Blvd Plume

Well No: PZ-20

Job No: 06-401S Personnel: KH

Date: 7.14.10

Sampling Method: ☒ Bladder Pump ☐ Peristaltic Pump ☐ Submersible Pump

Pump No.: SES IV

Depth to Water, ft: 44.58	Total Well Depth, ft: 69.91	Calculated Well Vol: 4.2 gals/vol.
Controller Settings: 15/25		Volume Purged, gal: 12.6 gals

Time	Temperature C°	Conductivity umhos/cm	pH	Turbidity ntu	DO mg/L	Redox mV	Remarks
1255	23.75	121	6.52	1603	4.39	108.1	initial
1605	23.50	128	6.06	19.1	4.85	87.1	
1610	23.32	127	6.03	16.2	4.96	83.2	
1615	23.28	126	6.11	17.4	5.01	82.7	
1620	sampled for VOCs						
							3 volumes

REQUESTED ANALYSIS:	EPA 8260 (CBP)
CONTAINER:	40 ML VOA HCL
QUANTITY:	3

RELINQUISHED BY: Kyle C. Hardy	DATE: 7.14.10	SHIPPED VIA: UPS

LOW-LYING AREA MONITORING

ENVIROCHEM Environmental Laboratories

A-Water - 1

Facility Name: ALDOT/Coliseum Blvd Plume **Job No:** 06-401 **Low Lying Area:** A-Sediment - 2

Sampling Method: Grab

Date/Time: 7.13.10/1035 **Personnel:** KH/SB **GPS Lat/Lon:**

~~3-Volatile Vials (water)~~ 2-Encores 1-4oz. (soil) Analysis: EPA 8260 (CBP)

Dry

B-Water - 3

Facility Name: ALDOT/Coliseum Blvd Plume **Job No:** 06-401 **Low Lying Area:** B-Sediment - 4

Sampling Method: Grab

Date/Time: 7.13.10/1050 **Personnel:** KH/SB **GPS Lat/Lon:**

~~3-Volatile Vials (water)~~ 2-Encores 1-4oz. (soil) Analysis: EPA 8260 (CBP)

Dry

C-Water - 5

Facility Name: ALDOT/Coliseum Blvd Plume **Job No:** 06-401 **Low Lying Area:** C-Sediment - 6

Sampling Method: Grab

Date/Time: 7.13.10/1105 **Personnel:** KH/SB **GPS Lat/Lon:**

~~3-Volatile Vials (water)~~ 2-Encores 1-4oz. (soil) Analysis: EPA 8260 (CBP)

Dry * Only one Encore / 4oz. soil jar Encore VOCs included

D-Water - 7

Facility Name: ALDOT/Coliseum Blvd Plume **Job No:** 06-401 **Low Lying Area:** D-Sediment - 8

Sampling Method: Grab

Date/Time: 7.13.10/1020 **Personnel:** KH/SB **GPS Lat/Lon:**

~~3-Volatile Vials (water)~~ 2-Encores 1-4oz. (soil) Analysis: EPA 8260 (CBP)

Dry

E-Water - 9

Facility Name: ALDOT/Coliseum Blvd Plume **Job No:** 06-401 **Low Lying Area:** E-Sediment - 10

Sampling Method: Grab

Date/Time: 7.13.10/1000 **Personnel:** KH/SB **GPS Lat/Lon:**

~~3-Volatile Vials (water)~~ 2-Encores 1-4oz. (soil) Analysis: EPA 8260 (CBP)

Dry
