For Immediate Release

Coliseum Boulevard Temporary Lane Closure Update: Traffic Control Barriers Temporarily Removed

The traffic control barriers at the intersection of Northern and Coliseum Boulevards are being temporarily removed as of Thursday, January 28, 2010. A sub contractor for McDonald Construction, the firm performing the work for the Alabama Department of Transportation on this phase of the Coliseum Boulevard Plume project, could not complete the work as specified and is being replaced.

The work, performing a horizontal bore for the water line relocation adjacent to Coliseum Boulevard, will resume when McDonald identifies and contracts an alternate subcontractor and provides an updated schedule.

Updates on this and other related work are posted weekly on ALDOT's Coliseum Boulevard Plume web site (<http://www.dot.state.al.us/>) and available 24-hours a day on the ALDOT Coliseum Boulevard Plume information line at: 334-353-6635.
